TMS 6000 - BENEFITS

Agrolog can be suitable for those who need a fully automated temperature and moisture monitoring system. This system consists of solid hardware and intelligent software.

- Real-time data – telemetry, monitoring and control 24/7
- Real-time 3D visualizations quickly illustrate where the problems occur in the silo
- REST Interface for integration with third party systems and an open system that gives developers access to advanced computations
- Be alerted by e-mail to the slightest change in your crops, even when not currently using the software
- Full historical chart for deeper insights into trends

TMS 6000 - HOW TO OPERATE

- Access the system anytime and anywhere using PC, smartphone or tablet etc.
- Increase safety. With one system you can control multiple silos from anywhere
- Centralised system. Achieves high security and protection of data
- Use the automated reports
- No software, backup or server maintenance
