E.1 - AGI EMEA FLAT BOTTOM SILOS FLOOR AERATION GRIDS

AGI EMEA offers a new level floor aeration grids to suit the flat bottom. The 500mm wide grids can be offered to suit wheat, corn, rape seed, rice as well as other cereals. It is cast into preformed channels within the silo base in an 'H' pattern, and designed to suit the specific diameter of the silo, to provide a very effective air distribution. Self-supported, with no additional supports or fixings required, the grids are simple to install & easily removed for cleaning. Optional preformed steel troughs to cast into the silo base are available at additional cost.
